SUMMARY

Full-stack web developer with more than 3 years of freelance experience building and maintaining modern web applications across the full stack using React, Node.js, TypeScript, and MongoDB, ensuring optimal performance and accessibility compliance. My work includes business websites, a published mobile app, and well-documented open-source libraries. I am actively seeking front-end or full-stack developer roles where I can apply my skills to solve real-world problems and build user experiences.

EXPERIENCE

Freelance Front-End Web Developer

July 2025

Learn Katai Japanese - <https://www.learnkataijapanese.com/>

Remote

- Built and launched the official business website using semantic HTML5, Next.js, TypeScript, and Tailwind CSS, resulting in a high-performance, SEO-optimized, and mobile-friendly site.
- Practiced secure coding principles and enforced web accessibility standards, ensuring compliance with development guidelines.
- Collaborated with the founder of this London-based Japanese tutoring service to translate brand goals into digital features that support student onboarding and engagement.
- Integrated Google Search Console and analytics tools to improve search ranking, visibility, and keyword targeting, establishing a stronger online presence.

Freelance Full-Stack Web Developer

October 2023 – Present

Scriptly Studios - <https://www.scriptlystudios.com/>

Remote

- Developed the official site using Next.js, SCSS, and WordPress, combining static performance with dynamic content management.
- Boosted SEO via Google Search Console and site optimization techniques, achieving an average rank of 1.3 for a key target keyword, helping drive a 10% increase in daily user sign-ups.
- Developed a RESTful API with Express to manage a NoSQL MongoDB database. The service efficiently processed hundreds of requests every minute during a large collaboration event, contributing to a 19% increase in the user base in a month.

PROJECTS

KanaFlow

September 2024

React Native Mobile App - <https://www.kanaflowapp.com/>

Solo Project

- Created and launched a Japanese kana memorization app using React Native with Expo, published on the Apple App Store with consistent user growth.
- Designed a clean, responsive landing page using React and SCSS, increasing visibility and conversions.
- Redesigned the app UI with Flexbox to better support tablet and desktop layouts, leading to a 34% increase in app downloads across all platforms.

EDUCATION

Community College

FL

AA in Computer Science and Programming

August 2022 – July 2024

CERTIFICATIONS

Meta Full Stack Developer Specialization

October 2025
